

Greetings friends, colleagues, gamers, advisers and bounty-hunters!

Our ICO has come to its conclusion, and unfortunately, we did not manage to raise the minimal required funds to carry on with our project as it is.

However, we do not intend to stop our plans: we are still planning to integrate the ZED token into the application. But with things how they are right now – it will take additional time. As of right now we have one goal – to continue raising funds, in order to realize all of our plans.

So, we are going to do the following:

1. Integrate FIAT currencies (building our own payment system).
2. Keep working on the application (updates and improvements of the app are going to be conducted based on our internal schedule)
3. We will start expanding on the markets of CIS countries.

As soon as we hit the necessary market cap to integrate our cryptocurrency, and to fulfill the promises regarding our ZED token – we will integrate the ZED token into the application, and list ourselves on the stocks \ exchangers, as was previously planned.

What will happen to the tokens:

Every participant of the contest.tradeplayz.com program will receive their tokens. The results will be published as a Google docs table online.

Every bounty-hunter will receive their tokens, according to what they had earned. The results will be available not later than 18.04.2018.

If you have invested any sum and would like to get a refund – we are prepared to make a refund – if you'd like to have it – please e-mail to alex@tradeplayz.com or nk@tradeplayz.com WITH THE FOLLOWING INFORMATION:

4. The wallet the funds came from
5. The wallet you paid from
6. The e-mail you've used to register at get.tradeplayz.com

To our players:

Until the end of April we are planning to integrate a payment system in our app with both crypto and FIAT. In your personal online cabinet section you will find a menu titled «ERC20 Wallet», where you have to input the address to where you would like to have your tokens transferred.

At the moment we are working on the technical side of this procedure. TradePlayz has managed to attract over 5000 users (for now!), but we really wouldn't like to transfer all the tokens MANUALLY ;)

More news on this will come soon, stay tuned!
